

New Product Names with continued excellence in Arla Plast Quality

### NEW NAME, SAME QUALITY

The name may have changed, but the product, its quality, our service, and our people remain the same. All contacts within Arla Plast remain the same and are happy to answer any questions about our products.

The sheet properties of old and new brands are identical, as the raw materials, the extrusion process and our manufacturing parameters have not changed.

### DENOMINATION

The main brand names of our solid polycarbonate (PC) sheet have changed as follows:

Standard clear PC	Makroclear	=> POLYCARBONATE CLEAR
Hard coated PC range	Saphir	=> POLYCARBONATE SAPHIR
Transparent/translucent coloured PC	Colorado	=> POLYCARBONATE COLOURED
Opaque coloured PC	Makrotech	=> POLYCARBONATE OPAQUE ATECH 7000
Opaque recycled PC	RPC	=> POLYCARBONATE OPAQUE ATECH 7000R

In case of PC with UV protection:

Standard clear PC	Makrolife	suffix UV	=> POLYCARBONATE CLEAR UV
Transparent/translucent coloured PC	Colorado UV		=> POLYCARBONATE COLOURED UV

A detailed overview of all the brand name changes is available on our website under 'names'.

Products with a printed protection masking have a new design.

### REGULATORY INFORMATION

Due to a recent change in legislation, it is mandatory that all test reports, certifications, and homologations are retested when the brand name is changed.

As products with the old brand names still are on the market, also the old test reports, certifications, and homologations for these are maintained.

This is also valid for CE marking and subsequent the DoP's.

Arla Plast is a leading producer, supplier, and retailer of solid and multiwall extruded sheets.

The product range covers polycarbonate solid and multiwall sheets, solid ABS, ABS-based and copolyester sheet.
